Chairman's Statement

Chief Executive's Report

2007 Global Insurance Review and Outlook for 2008*

World insurance premiums income amounted to USD 4,061 billion in 2007. This was split into USD 2393 billion in life and USD 1668 billion in non-life insurance. Life business made up 59%, same as in 2006. According to New Swiss Re sigma study (Sigma No. 3/2008) total premium volume grew by 3.3%, in real terms, with life premiums increasing by 5.4% and non-life premiums by 0.7%.

In 2007, the life insurance premiums increased by 5.4%, which is above the previous ten year average. In industrialised economies sales of retirement and other wealth accumulation products spurred the growth in life insurance.

The growth in life insurance business was driven to large extent by the trend towards single premium business, pension and annuities products in countries where an aging population and reductions in state social security benefits were causing a shift from the traditional life insurance models to pension-driven models.

Global non-life insurance business was profitable despite slow growth of 0.7% in real terms. Non-life premiums decreased by 0.3% in the industrialized economies and increased by 10% in the emerging market displaying a continued divergence in performance between the industrialised world and the emerging markets.

In emerging markets, strong economic performance and catch-up potential were key drivers of the growth. Globally, downward pressure on premium rates continued in some countries, though overall technical results were favourable and profitability remained sound.

Global Insurance business outlook

The prospects for growth in life insurance premium in 2008 is expected to moderate as capital and stock market confusion dampen demand.

Non-life insurance premiums are expected to fall in the industrialised economies with a slightly slower growth rate in the emerging economies. Rising global inflation is expected to increased claims costs in long-tail business lines, which will eventually lower profitability.

Domestic Macro-Economic Review and Insurance Demand

The year 2007 being electioneering year there were a lot of uncertainties, which affected most the industries. The anticipated Safaricom Initial Public Offer (IPO) also affected some sectors of economy especially the financial sector.

During the same period there was laxity in laws enforcement especially in the transport sector due to campaigns. This resulted to a 10% increase in persons injured or killed in road incidents in 2007; from 23,264 in 2006 to 25,588 in 2007(Economic Survey 2008).

The economy expanded by 7.0% in 2007 compared to previous year revised growth of 6.4% in real terms. The key growth drivers were Transport and Communications, taxes on products Manufacturing, Wholesale and Retail Trade sectors. Insurance sector expanded by 6.0% in 2006.

During the period under review the financial sector recorded a growth of 6.5% compared to 5.5% growth in 2006. The financial sector growth can be attributed to improved public access to financial services as a result of stiff competition within the sector, increased awareness and participation in the capital market.

Real per capita grew by 4.0% in 2007 compared 3.5% revised growth in 2006. Average interest rate on 91days treasury bills increased by 5.2% points by December 2007 to stand at 6.9%, however in real terms all interest rates were negative owing to high inflation rate during the period. The overall year on year inflation dropped from 14.5% in 2006 to 9.8% in 2007.

Financial Markets

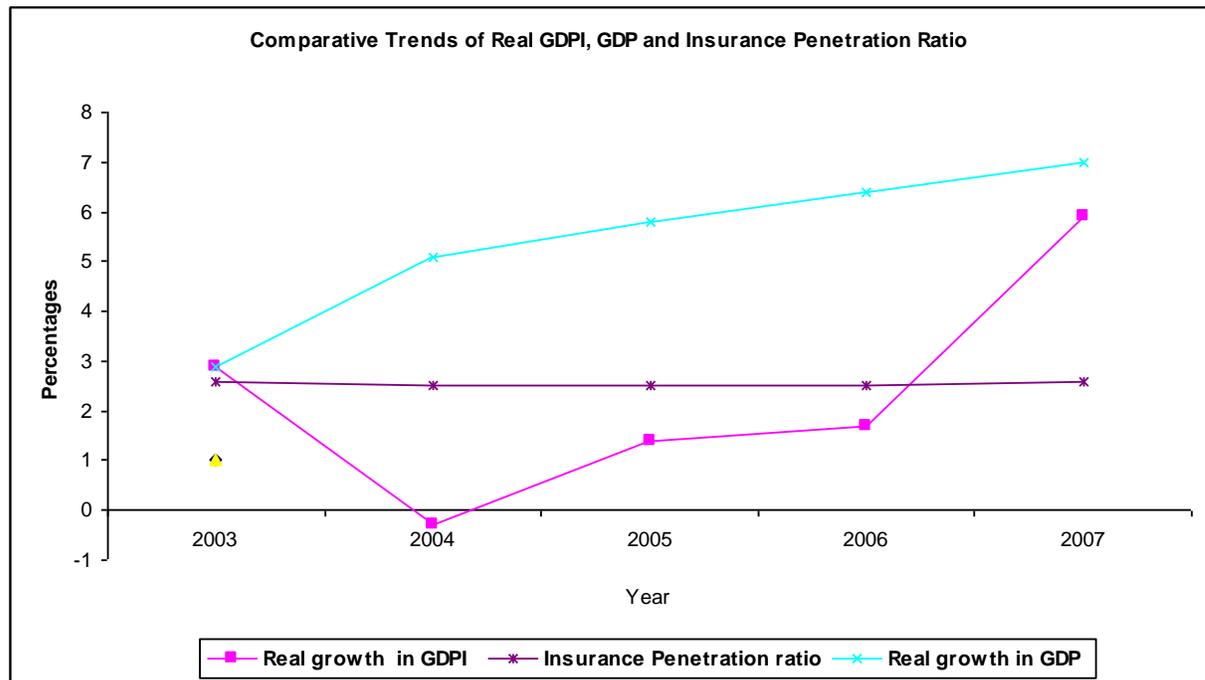

The stock market (NSE) experienced a downward turn over the period under review. The insurance industry invested Ksh29.7 billion in ordinary shares in 2007 compared to Ksh25.8 billion in 2006. This was a growth of 15.1% compared to 63.3% recorded in 2006. The share of insurance industry investments in ordinary shares to total industry investments dropped from 26.9% in 2006 to 25.9% in 2007. On the other hand share of investments in Government securities by insurers increased slightly above 2006 position of 32.4 to stand at 33.2 % up 2.5 % points in 2007.

Sources: GOK Annual Economic Survey and Annual Insurance Reports

Insurance penetration ratio increased by 4% to stand at 2.6% in 2007. Real premium growth continued to improve rising from 1.7% in 2006 to 5.9% in 2007. On per capita basis (Insurance density) an average of Kshs. 1,290.6 was spent on insurance.

During the year under review non-life underwriting results for the industry reduced by 67%. This was mainly contributed by a decline in underwriting profits in the following classes: Aviation, Fire Industrial, Marine, Motor Commercial, Motor Private and Workmen's Compensation.

The life insurance business grew by 29.7% during the year; however the penetration is still very low at 0.9%. On the other hand general insurance business grew by 9.3% with a penetration 1.7%.

Challenges facing the industry

The insurance industry faces a number of challenges, among them;

- Over capacity and price wars
- Poor corporate governance
- Inadequate legislative and regulatory framework
- Financially weak insurance organizations
- Negative public perception and awareness of insurance
- High cost of insurance
- Corruption and fraud among the stakeholders
- Overdependence on traditional products and distribution channels.

We have recognized the need to ensure that our restructuring processes, legislative amendments, capacity building, and institutional strengthening remain aligned with our operational goals as well as the government's strategic obligations as given in its vision 2030.

In conclusion, I would like to thank all the industry players for the support and cooperation accorded to IRA and congratulates the IRA staff for showing such patience and resilience during that period of change.

The highest number of complaints emanated from employees citing unauthorized deductions by their employers and remitted to insurers for policies they have not signed for. This is normally a result of misselling by insurance agents.

On the other hand every insurer carrying on general insurance business in Kenya is required to keep at all times admitted assets of not less than the aggregate value of his admitted liabilities and ten million shillings, or 15% of his net premium income during his last preceding financial year, whichever is the greater.

Insurers carrying on both long term and general insurance business were required to maintain separate solvency margins. Analysis of the technical solvency of each insurer is included in the summaries. The industry solvency margin ratio (SMR) for long term and general insurance business stood at 272% and 502% respectively in 2007, implying that the industry was generally solvent. However the SMR for six insurers were below 100%. The solvency margin ratio is calculated by taking available solvency margin (ASM) divided by required solvency margin (RSM) as a percentage.

1.13 INSURANCE PREMIUM LEVY

The 1.5% premium levy and penalties collected as per section 197 is paid by both insurers and medical insurance providers. Effective 1st May 2007 premium levies became payable to IRA and payment of premium taxes to the Ministry of finance ceased. During the year insurers' premium levy amounted to Kshs.593.10 million against Kshs.508.42 million in 2006 representing a growth of 16.7%. The medical insurance providers paid a total of KShs.27.82 million as premium levy during the year 2007 a growth of 53.1% from the previous year.

On the other hand the 5% reinsurance premium levy and penalties amounted to Kshs.78.34 million against Kshs.76.22 million in 2006 representing an increase of 2.8%.

1.14 INSURANCE TRAINING LEVY

The 0.2% insurance training levy is levied on the gross direct premium written by general insurers. The levy is charged on the policyholders and collected by the insurers on behalf of Insurance Training and Education Trust. During the year 2007, an amount of Kshs.61.63 million was collected compared to Kshs.54.76 million in 2006 representing a growth of 12.5%.

1.15 POLICYHOLDERS' COMPENSATION FUND

The Policyholders' Compensation Fund (PHCF) was established on 24th September 2004 by the Minister for Finance pursuant to the provisions of Section 179 (2) of the Insurance Act. Net actuarial liabilities for the industry before distribution of surplus amounted to Kshs.49.02 billion. The total surplus arising in the valuations amounted to Kshs.8.97 billion. Of the total surplus, Kshs.2.2 billion was distributed to policyholders as bonus to participating individual policies or interest to Deposit Administration Schemes. Kshs.0.7 billion went to shareholders while the balance was carried forward un-appropriated in the life funds.

All insurers complied with Section 46(5) of the Insurance Act on the distribution of surplus to the shareholders.

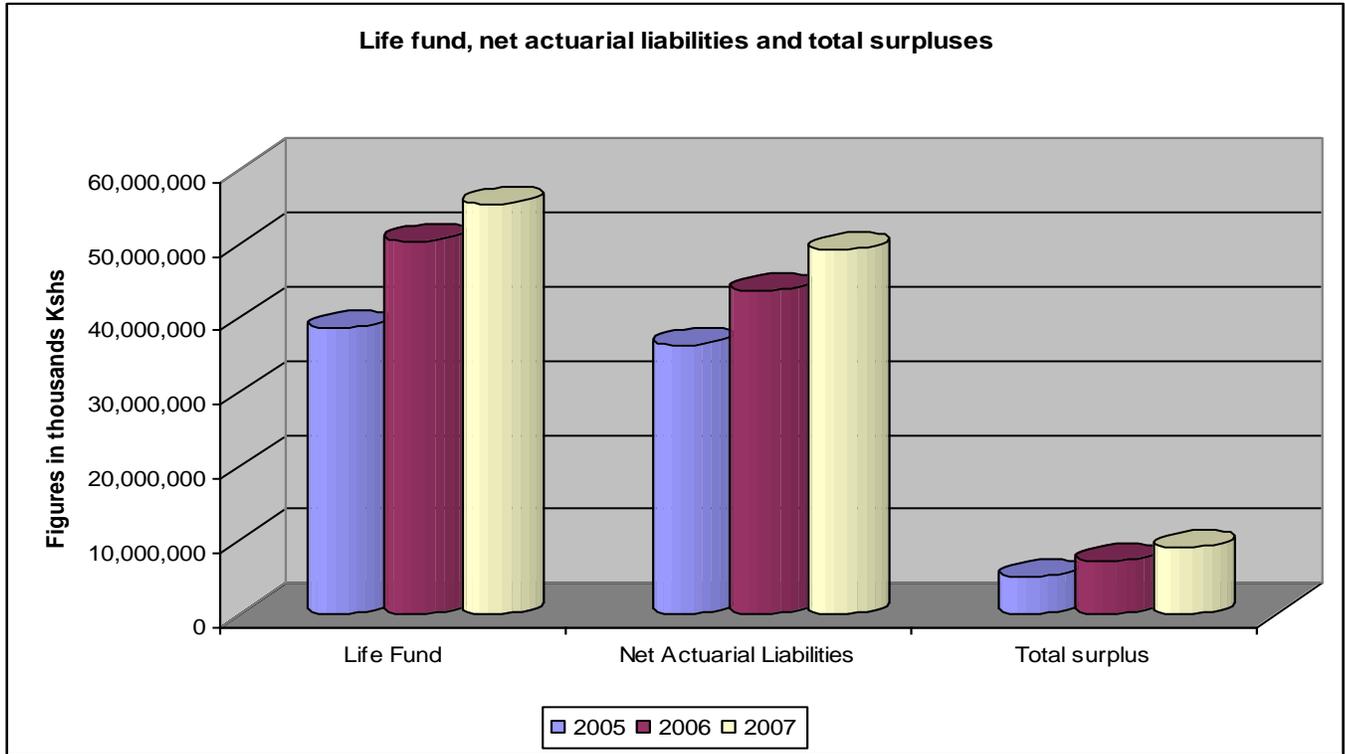

The table below shows total life-funds, net actuarial liabilities and distribution of surpluses:

The Kenya Reinsurance Corporation continues to enjoy 18% mandatory cessions on all treaties, which is set to expire on 1st January 2011 or on privatization whichever comes earlier. PTA Reinsurance Company and Africa Reinsurance Corporation enjoy mandatory treaty cessions of 10% and 5% respectively. Note that for the purpose of the Insurance Act, reinsurance companies are generally treated as insurance companies.

1.18 INSURANCE APPEALS TRIBUNAL
